PROJECTS

Kanban Board JavaScript, HTML, CSS | Live Link

- Built a responsive Kanban board with ToDo, In Progress, and Completed columns, using drag and drop and event listeners to add, delete, and move tasks between columns.
- Implemented localStorage to save tasks so they persist after a page refresh.

Bubble game HTML, CSS, JavaScript | Live Link

- Developed an interactive bubble-hitting game that dynamically generates 192 numbered bubbles with JavaScript and a random target number, updating the live score on each correct hit.
- Implemented event delegation, a setInterval countdown timer, Start/Pause/Restart controls, and game-over logic that tracks the highest score.
